ADVANCING CHEMISTRY. ENHANCING HEALTH

FORWARD LOOKING STATEMENTS

Sirona Biochem cautions you that statements included in this presentation that are not a description of historical facts may be forward-looking statements. Forward-looking statements are only predictions based upon current expectations and involve known and unknown risks and uncertainties. You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date of release of the relevant information, unless explicitly stated otherwise. Actual results, performance or achievement could differ materially from those expressed in, or implied by, Sirona Biochem's forward-looking statements due to the risks and uncertainties inherent in Sirona Biochem's business including, without limitation, statements about: the progress and timing of its clinical trials; difficulties or delays in development, testing, obtaining regulatory approval, producing and marketing its products; unexpected adverse side effects or inadequate therapeutic efficacy of its products that could delay or prevent product development or commercialization; the scope and validity of patent protection for its products; competition from other pharmaceutical or biotechnology companies; and its ability to obtain additional financing to support its operations. Sirona Biochem does not assume any obligation to update any forward-looking statements except as required by law.

INVESTMENT HIGHLIGHTS

Sirona Biochem is a cosmetic ingredient and drug discovery company with a proprietary platform technology. Through its wholly-owned French subsidiary TFChem, the Company specialises in stabilising carbohydrate molecules with the goal of improving efficacy and safety. Sirona Biochem's business model is to develop active ingredients that are then licensed out for up front payments, milestones and royalties.

- **Disruptive** proprietary carbohydrate-chemistry platform based on over 20 years of research and development.
- **Breakthrough** technology TFC-1326 **for anti-aging**. [Clinical results released April 25, 2023](#).
- **In 2022, executed a global exclusive licensing deal** with **Allergan Aesthetics**, an **AbbVie** [NYSE: ABBV] company, for compound **TFC-1067**
- Research & discovery business model with **up-front, milestone and ongoing royalty payments** (including **upcoming royalties** on net sales generated by **AbbVie** product line based on licensed patented ingredients. Cooperating on additional products with AbbVie. **17 years** duration for TFC-1067 patents).
- Strong worldwide IP portfolio, including North America, European Union, and Asia.
- **Cosmeceutical** - Developing disruptive solutions for **anti-aging (\$271B USD)** and **cellulite treatment (\$1.4B USD)**,
- **Pharmaceutical** - TFC-039, SGLT2 Inhibitor targeting human and animal diabetes. In advanced partnership talks for both indications.
 - Developing Anti-viral compound for \$36B USD anti-viral market.
- State-of-the-art, multi-million dollar laboratory in France with top scientific team, strong| **global manufacturing partners** for pharmaceutical (**Wanbang Pharma**, China) and cosmetics (**Wuxi AppTec**, China).

BUSINESS MODEL & STRATEGY

Sirona Biochem's strategy
is to **license or sell**
patented compounds to leading
global companies in return for
up-front fees, milestone fees
and ongoing royalty payments.

BUSINESS MODEL SUCCESS

Allergan Aesthetics,
an **AbbVie** [NYSE: ABBV] company, signed a
global exclusive licensing deal
with **Sirona Biochem**
for its library of breakthrough dark-spot corrector
compounds, including **TFC-1067**

PRODUCT PIPELINE

Cosmetic Products

Pharmaceutical Products

Sirona Biochem has invested extensively in developing products to meet the needs of patients and industry partners. The compounds created through the company's **proprietary platform** go through rigorous tests and regulatory scrutiny to verify their safety and efficacy.

COSMETIC PRODUCTS

Therapeutic Area	Compound	Status
Skincare - Dark spot corrector (Rx & OTC)	TFC-1067 & family of dark spot correctors	• Exclusive global licensing deal with AbbVie
Cell Preservation & Repair (incl keloid & scar therapy)	Glycoprotein Library	• Ongoing lead determination
Skincare - Anti-Aging/ Anti-wrinkle	TFC-1326	• Clinical study completed in Spring 2023 • Partnering activities started
Skincare - Cellulite Treatment	TBA	• Ongoing research & development

ESTIMATED MARKET SIZE

Skincare - Anti-Aging/Anti-wrinkle	\$271B USD by 2024
Skincare - Dark spot corrector (OTC & Rx)	\$8B USD
Cell Preservation & Repair (incl keloid & scar therapy)	\$7.5B USD
Skincare - Cellulite Treatment	\$1.45B USD

PHARMACEUTICAL PRODUCTS

Therapeutic Area	Compound	Status
Diabetes & Other (SGLT2 inhibitor)	TFC-039	<ul style="list-style-type: none"> • In due diligence & discussions with interested parties from the animal health sector • In due diligence & discussion for regional human health license
Anti-viral	TBD (from library)	<ul style="list-style-type: none"> • Entered into R&D collaboration with International Centre for Genetic Engineering and Biotechnology (ICGEB) • Completed first round of screening with library. 6 compounds showed efficacy. New generation will be sent for round of screening in May 2023.

ESTIMATED MARKET SIZE

Anti-Viral	\$36.98B USD
Diabetes & Other (SGLT2 inhibitor)	\$7.2B USD

Sirona Biochem is continually discovering new compounds and molecules, with the goal of advancing global medicine and health care.

sirona
biochem

WORLDWIDE IP PORTFOLIO

Sirona Biochem has a **strong IP portfolio**,
including a recently filed patent for its
breakthrough anti-aging compound **TFC-1326**,
managed by intellectual property law firm
Cabinet Regimbeau, Paris France

REGIMBEAU
Creative IP

MILESTONES

Milestones achieved in the last 12 months:

- ✓ Completed successful [12 week clinical study](#) for anti-aging compound TFC-1326
- ✓ Completed an oversubscribed financing of \$1.53M CAD
- ✓ Completed an exclusive, global license with AbbVie for TFC-1067
- ✓ Completed a first round of testing the antiviral library with ICGEB
- ✓ Initiated scale-up and manufacturing of the anti-aging compound
- ✓ Completed a successful clinical safety study for TFC-1326
- ✓ Awarded a financing partnership with the French Government
- ✓ Completed a significant patent extension for the anti-aging compounds

Sirona is working toward achieving the following milestones:

- Execute supply agreement with AbbVie
- Finalize an agreement for the SGLT2 inhibitor in animal health
- Finalize an agreement for the SGLT2 inhibitor for human health in new territory
- Begin partnership due diligence with companies for licensing TFC-1326
- Complete the second round of antiviral compound screening and advance to pre-clinical studies
- Advance and patent the SGLT2 inhibitor in various potential therapy areas
- Secure non-dilutive funding through grants
- File patents around novel compounds and therapy areas of interest

OUR NEXT BIG THING: Anti-Aging - TFC-1326

TFC-1326 & Compound Library

The anti-aging market is forecast to reach **\$271 Billion** by 2024, with anti-wrinkle accounting for **59.3%** of the total share.

Sirona recently filed a patent for its glycopeptides treatment, which rejuvenates and restores the skin's youthful glow by significantly increasing lipid synthesis.

Our next big breakthrough compound

TFC-1326 could become the industry's new go-to active ingredient to reverse skin aging by smoothing wrinkles and repairing skin damage. The technology could also be potentially applied to other cosmetic categories such as hair care, makeup and suncare.

Sirona has successfully completed the first clinical trial with TFC-1326 with exceptional results. [See before and after results.](#)

OUR NEXT BIG THING: Animal Health - TFC-039

INDUSTRY PROBLEM

It's estimated that **1.7 million cats** will develop **diabetes**. Treatment is needed to manage their condition, often requiring twice-daily injections.

Pet ownership rose sharply during the COVID-19 pandemic, pushing the animal health care market to more than **\$139 billion** and is predicted to grow at over **4.7%**

Sirona intends to be one of the first companies to bring a solution to the market.

INDUSTRY SOLUTION

Injections are inconvenient for owners and painful for pets. A **diabetes pill** made from **Sirona's TFC-039 compound** solves that problem and keeps pets healthy and happy.

Sirona has the solution to address this problem.

Top 5 Animal Pharmaceutical Companies and Revenue

Merck \$47.99B USD	Boehringer Ingelheim \$22B USD	Zoetis \$7.78B USD	Covertus \$4.33B USD	Elanco \$3.27B USD
------------------------------	--	------------------------------	--------------------------------	------------------------------

FACILITIES/MANUFACTURING PARTNER

Sirona Biochem Laboratory

TFChem Laboratory, France

The 502-square-meter laboratory is located in Val de Reuil, France. This state-of-the-art facility is located in France's Cosmetic Valley, where the world's leading cosmetic companies conduct their research and development.

The award-winning team at the lab specialize in developing fluorinated building blocks, which address the limitations usually associated with the application of carbohydrate-based molecules as active ingredients.

www.sironabiochem.com

Manufacturing Partner - TFC-1067

WuXi AppTec, China

WuXi AppTec provides a broad R&D and manufacturing services portfolio that enables the global pharmaceutical and healthcare industry to advance discoveries and deliver groundbreaking treatments to patients.

The company has research, development, and manufacturing facilities in China, South Korea, the U.S., Germany, the UK, Switzerland, and Israel.

www.wuxiapptec.com

Manufacturing Partner - TFC-039

Wanbang Pharma, China

Wanbang Biopharma has established a domestic first-class R&D and manufacturing site in China for genetic engineering drugs of prokaryotic and eukaryotic cells.

The company employs more than 300 highly-educated professionals at its more than seven manufacturing sites across China, with a total area of more than 675,000 square meters.

www.chinawanbang.com

TECHNOLOGY

Our world-class team is comprised of **award-winning scientists** who have worked for Fortune 500 companies such as **Sanofi, GSK** and **Bayer**.

Carbohydrate compounds have immense commercial potential.

- They are involved in many of our body's biological processes and are also used for development of active ingredients in pharmaceuticals and cosmetics

Examples of successful carbohydrate-based drugs are:

- Anti-viral medications such as **Tamiflu**, used for the treatment of Influenza A
 - Tamiflu: sales passed \$931 Million USD during swine flu epidemic (2019) -
- Blood thinners, such as: **Arixtra** and **Lovenox**, for the treatment of blood clots
 - Lovenox: sales of \$1.46 Billion USD (2018)

Geraldine Deliencourt-Godefroy, PhD

Founder, TFChem
Chief Scientific Officer

Our Technology has received more than **\$8M CAD** in grants from the French Government, including new financing to develop its advance chemistry process.

The challenges with carbohydrates are:

- Carbohydrates have complex syntheses requiring expert chemists
- Carbohydrates are unstable, causing lower efficacy or toxic by-products
- Carbohydrates have poor pharmacological properties

Sirona Biochem's
proprietary chemistry
increases the potential and
reduces the drawbacks
of carbohydrate molecules

- Sirona's Fluorination Chemistry Technology is **the solution** to **unstable carbohydrate molecules**.

- The chemistry strengthens the bonds of a carbohydrate molecule by strategically placing fluorine atoms.

Carbohydrate molecules
are unstable by nature

Sirona's technology
stabilizes carbohydrate
molecule

MANAGEMENT

Howard J. Verrico, MD

Founder, Sirona Biochem
CEO and Chairman of the Board

Dr. Verrico obtained his medical degree from the University of Toronto in 1985 and has been a member of the College of Physicians and Surgeons of British Columbia since July 1986. Dr. Verrico has extensive experience as a venture capitalist in the junior capital markets. He has acted as a venture capitalist for over 30 years, funding numerous start-ups and early-stage companies both in the private and public marketplace. He is the original founder of Sirona Biochem building the company by investing his personal funds starting in 2006. He has accumulated his large share position through personal share purchases. He currently is solely focused on the success and growth of SIRONA Biochem as it enters a stage of rapid growth.

Geraldine Deliencourt-Godefroy, PhD

Founder, TFChem
Chief Scientific Officer

Dr. Géraldine Deliencourt-Godefroy is an award-winning synthetic chemist and the founder of French-based biotechnology company TFChem. Since the acquisition of TFChem by Sirona Biochem in March 2011, Dr. Deliencourt-Godefroy has assumed the role of Chief Scientific Officer. Her scientific research in carbohydrate chemistry has led to the discovery of new drug families and the development of drug candidates for diabetes and obesity, cosmetic ingredients and biological adjuvants. Previous to founding TFChem, Dr. Deliencourt-Godefroy was a scientific leader at INSA (National Institute of Applied Sciences) in Rouen, France, where she developed a new technology for stabilized carbohydrates. Previous roles also include a post-doctoral position at the University College London and doctoral research at the Research Institute of Fine Organic Chemistry in Rouen, France. Dr. Deliencourt-Godefroy received a PhD and Masters in Organic Chemistry as well as her business degree from the University of France. She is the author of several publications and patents and is also the recipient of the acclaimed Francinov Research and Innovation Medal, French Ministry of Research Award and the French Senate Award.

Christopher Hopton, CPA, CGA

Chief Financial Officer

Christopher Hopton, Sirona Biochem's Chief Financial Officer, brings 28 years of expertise in financial management and operations. His extensive experience covers areas of financial planning, accounting policy and business process improvement. As a business investment and finance consultant, Mr. Hopton has worked with several public and privately-held companies. Most recently, Mr. Hopton was the Chief Financial Officer of Central Resources Corp., a junior mineral exploration company. Formerly, he held the position of Division Controller at Canadian Airlines where he was responsible for an annual operating budget of \$200M. Mr. Hopton was also involved in the restructuring of 360 Networks, a network communications company, which led to a buyout by Bell Canada. Mr. Hopton earned his Bachelor of Business Administration from Simon Fraser University in British Columbia, Canada and received his professional designation as a Certified General Accountant.

Michelle Seltenrich, MBA, BSc

Vice President - Operations

Michelle Seltenrich brings 21 years of expertise in publicly traded biotech companies. Her experience ranges from both academic and industrial R&D lab management to corporate mergers and acquisitions. Ms. Seltenrich was previously the Manager of Business Development at Forbes MediTech, a NASDAQ traded company, where she was responsible for international business development, in-licensing and M&A. She co-led a team in the successful acquisition of a U.S.-based biotech company. Ms. Seltenrich holds a BSc from the University of British Columbia and an MBA in Technology Management from Simon Fraser University.
